PROFESSIONAL SUMMARY

Recent Software Design and Development Engineering graduate with a 9.3/10 GPA and hands-on experience building responsive full-stack web applications, frontend and backend services, REST APIs, and relational database solutions. Developed end-to-end applications using Java, Spring Boot, JavaScript, React, Vue.js, PostgreSQL, and MySQL, with exposure to Git-based workflows, API testing, Docker containerization and AWS deployment. Brings analytical problem-solving, strong commitment to achieving assigned objectives and deadlines. clear communication, adaptability, and disciplined execution to software development, application support, data analytics, quality assurance and entry-level IT roles.

SKILLS

- Design, develop, test, deploy, and support full stack applications. Agile delivery
- Full-Stack Development (Java, Spring Boot, HTML, Angular, React)
- Databases (PostgreSQL, MySQL)
- Version Control (Git / GitHub)
- Containers & Deployment (Docker, AWS)
- Frontend (React, Vue, JavaScript)
- AI-Assisted Development, Claude
- API (Postman)
- Problem-Solving Mindset
- Commitment to meet deadlines
- Clear & Direct Communication
- Adaptability & Fast Learning
- Team Collaboration
- Time Management & Punctuality
- Fast Learner,
- Eager to Grow Professionally
- Continuous improvement mindset.

WORK HISTORY

BUSINESS DATA ANALYST | 07/2025 to 02/2026

BRITEGENIX, Aguascalientes, MX (Nearshore IT & BPO Solutions)

- Collected and structured data from public sources and web pages for organized database storage and downstream business use.
- Prepared data used in prospecting campaigns and direct outreach to potential clients, supporting new business development activities.
- Performed detailed trend analysis, communicates clearly with stakeholders,

FREELANCE PROJECTS

E-COMMERCE PLATFORM - VIRTUAL STORE | 2025

Built a full-stack e-commerce web application.

Transform functional and non-functional product requirements into software components that comply with specifications. It includes understanding the specifications/requirements; design, code and test software components unitarily; automate unit tests; commenting/documenting standards-compliant code; Repair code defects found during testing phase. Designed a responsive React frontend to deliver a smooth, modern shopping experience.

Tech Stack: Java 17, Spring Boot, and PostgreSQL, featuring JWT-based authentication, role-based access control, product catalog management, and a complete shopping cart and checkout flow.

GYM MANAGEMENT SAAS PLATFORM | 2025

Designed and developed a SaaS-style gym management system to handle memberships, class scheduling, and payment tracking. Built with a Vue.js frontend and a Spring Boot / PostgreSQL backend, allowing administrators to manage clients and staff to track attendance in real time

AI-POWERED FITNESS COACHING PLATFORM | 2025

Developed an AI-driven fitness platform that generates personalized workout routines based on user goals and tracks progress over time, combining a Java Spring Boot backend with AI-assisted logic for adaptive training plans

RESTAURANT POS SYSTEM | 2025

Built a point-of-sale system for restaurants with inventory management, cash-register operations, and order tracking, using Java 17, Spring Boot, and PostgreSQL to streamline daily restaurant operations.

EDUCATION

B.S. in Software Design and Development Engineering, 2023-2026

Universidad Cuauhtémoc Aguascalientes. – Ags. MX.

- Graduated with academic honors
- 9.3/10 GPA

MySQL Implementation Associate

Oracle Certified Specialist, Oracle University — July 2025

LANGUAGES

English, Spanish

OTHERS

Dual Citizenship: USA and Mexico

Willingness to Relocate & Travel

Hobbies: Gym training and listen rock music
